

PATRICK BOUDREAUX

Software Engineer

115 Brigade Ave, Canton, MS 39046 · patrick.d.boudreaux@gmail.com · (601) 519-1463

SUMMARY

Mississippi State University graduate with a Bachelor's in Software Engineering. Founder of ClasScape, a company dedicated to gamifying school assessments. Served as Co-Team Lead on the Advanced Driver Assistance Systems (A.D.A.S.) team of MSU's 2018 EcoCar team. Currently an IT Specialist at All Current, working on the migration of Most Electric's systems following its acquisition, after six years as a remote developer building and integrating WordPress e-commerce sites with a custom .NET/SQL inventory management system.

EXPERIENCE

IT Specialist

June 2026 – Present

All Current | Jackson, MS

- Maintain the Most Electric website and inventory management software
- Key contributor to the migration of Most Electric's data, accounts, and software systems
- Provide helpdesk support
- Rack-and-stack hardware across the newly acquired locations

Remote Developer

November 2020 – June 2026

Most Electric | Jackson, MS

- Created and managed the hosting environment for company websites on Azure and Google VMs
- Used REST APIs in VB.NET to integrate WordPress with a custom inventory management system
- Debugged, optimized, and extended custom software built using .NET and SQL
- Designed and built four WordPress e-commerce websites to specification
- Managed the full procurement cycle for new software and trained employees in its use
- Provided on-site IT, including setting up and maintaining phones and internet

Startup Founder

July 2018 – January 2022

ClasScape, LLC | Starkville, MS

- Led a team and collaborated with mentors to create demos, plans, projections, and presentations
- Developed a virtual reality education tool demo using Unreal Engine 4 and WordPress
- Applied for and received several grants and awards
- Conducted school demos and market research

Graduate Research Assistant

January 2019 – May 2019

CAVS | Mississippi State, MS

- Researched cutting-edge simulation technology
- Created formal reports for clients and served as vendor relationship manager
- Analyzed data to define project requirements

A.D.A.S. Co-Lead — EcoCar

August 2017 – May 2018

Mississippi State University | Mississippi State, MS

- Assigned and monitored tasks needed to reach project goals
- Developed software for object detection and sensor fusion in a UNIX system
- Developed software in collaboration with a multi-team organization
